

HIPCOM COMPLETES BT WHOLESALE IP EXCHANGE INTERCONNECT

Hosted IP Telephony provider Hipcom announces that they have successfully completed testing with BT Wholesale's IP Exchange service and is now terminating live traffic.

James Brind, Hipcom CTO commented that "Hipcom shares BT's vision of the 21CN. Hipcom's next generation Hosted IP telephony platform, launched in 2005, is an IP/SIP network with no TDM. This allowed us to simply overlay our Hosted Voice Services onto BT's IP Exchange giving resellers direct access in two forms – Hipcom managed termination, or via Hipcom's Minutes Exchange (HEX). HEX allows a reseller to maintain direct carrier relationships for all of their Hosted IP Telephony traffic"

Notes for editors:

About Hipcom

Hipcom specialises in the provisioning of high-quality Hosted IP Telephony solutions, sold through a network of channel partners in the UK and supported by a range of carefully selected strategic partnerships with leading VoIP vendor's world wide.

Hipcom are at the forefront of the industry, producing innovative Hosted IP Telephony solutions created specifically for the UK Reseller Channel. Their platform provides carrier grade enterprise telephony features allowing partners to enter this rapidly growing market, secure new business and provide customers with advanced, feature rich telephony services.
